VICTORIA SCIARONI

DATA ENGINEER

EDUCATION

University of California, Santa Cruz
Bachelor's Degree in Astrophysics
2020
Dean's List Recipient

SKILLS AND PROFICIENCIES

- 10 years of research and data analysis experience
- Python
- Databricks/Spark
- GeoJSON, GeoPandas
- Spatial Data Processing
- Grafana
- Docker
- GraphQL, SQL
- FastAPI, REST API
- InfluxDB
- GitHub
- Ignition, SCADA, HMI integration
- Tableau
- Dash, Plotly, Matplotlib, React
- Pandas
- MES (ION)
- ML algorithms
- Theoretical and observational astrophysics (protoplanetary disks)
- Teaching and educational outreach

UNIVERSITY OF CALIFORNIA, SANTA CRUZ
BACHELOR'S DEGREE IN ASTROPHYSICS
2020
DEAN'S LIST RECIPIENT

PROFESSIONAL EXPERIENCE

Data Engineer
May 2024 - Present
Joby Aviation

- Process and analyze geospatial telemetry (e.g., GPS/flight path data) to support spatial analysis, tracking, and visualization of aircraft operations
- Design and query relational and semi-structured datasets to support time-series analysis, dashboards, and operational reporting
- Build and maintain ETL production data pipelines using Databricks
- Develop and maintain data tools and dashboards that help teams explore operational data, investigate trends, and make informed engineering decisions.

Automation Controls Engineer
March 2023 - May 2024
Joby Aviation

- Automated backend data pipelines and software workflows to improve reliability and reduce manual effort
- Designed and deployed internal web applications and dashboards that increased manufacturing technician efficiency
- Built tools that streamlined data flow between production systems, enabling faster decision-making on the factory floor

Data Analyst
June 2022 - March 2023
Space Telescope Science Institute

- Gathered, analyzed, and validated publication metadata using APIs and Python to support internal and external stakeholders
- Maintained and reviewed daily bibliographic updates for the James Webb Space Telescope and Hubble Space Telescope
- Improved accuracy and usability of metrics used for scientific reporting and impact analysis

Middle School Teacher
October 2020 - June 2022
Challenger School

- Taught computer science (Python), logic, and economics to 6th–8th grade students
- Developed lesson plans that introduced programming fundamentals, problem-solving, and analytical thinking

Data Scientist
March 2020 - March 2021
PWR Lab

- Analyzed GPS running watch data to identify trends and changes in runner behavior
- Queried SQL databases to extract and preprocess large datasets for analysis
- Trained and evaluated machine learning models to uncover behavioral patterns

RESEARCH EXPERIENCE

UC Santa Cruz

- Built analytic and numerical models in Python; analyzed large observational datasets to validate models and quantify uncertainty
- Applied statistical analysis, signal processing, and data reduction techniques to noisy real-world data
